

Utah Geological Survey Coal Research

(with a discussion of the Annual Coal Report)

Presented by David Tabet

Energy and Minerals Program Manager

To the Utah Mine Safety Commission

October 22, 2007

Utah Geological Survey Mission

- Provide timely scientific information about Utah's geologic environment, resources and hazards (UGS does research, not regulation).
- Strong emphasis on outreach. The UGS is committed to cooperation with local, state and federal agencies, universities, industry, and private groups to promote economic development and public safety in Utah. Want to help decision makers and the public more knowledgeable about natural-resource issues facing the state.

UGS Goals

- Identify, inventory, assess and encourage prudent development of Utah's mineral, energy, ground-water, and paleontological resources.
- Identify, inventory, assess, and mitigate Utah's geologic hazards and subsurface environmental hazards to promote safe and responsible land use.
- Serve as a repository of geologic samples and data for Utah.
- Provide accurate and timely geologic, topographic, and energy information and advice to government, industry, educators, and the public.
- Prepare, publish, and distribute maps and reports of the geology of the state.

UGS Coal Research

- Conduct research to understand the nature and extent of coal resources, and characteristics that may affect usage.
- Strictly non-regulatory, work cooperatively with industry.
- Have ability and authority to use and store company confidential resource data.
- Track coal production to monitor health and sustainability of coal industry.
- Report research results to RAC, GOPB, and citizens of Utah.
- Receive funding from USGS, BLM, DOE, OSM, MSHA.

History of Annual Coal Report

- 1987 - first annual coal report published at UGS, co-authored by UGS and Utah Energy Office.
- 1988-2000 - Coal reports published by Utah Energy Office and later Office of Energy and Resource Planning in DNR.
- 2001 - coal report written by UGS, and published by DNR Office of Energy and Resource Planning.
- 2002-2003 - Coal reports published by DNR Office of Energy and Resource Planning.
- 2004-present - Coal reports published by UGS.

Nature of Annual Coal Report

- Reports annual snapshot of coal industry from one-time visit by Energy Office and UGS personnel.
- Information provided to state is totally voluntary by industry.
- No underground inspection of mines is made; information is compiled from questionnaires sent to operators, public sources, and interviews during annual visit.
- Information on company activities is sent to operators for review and approval.
